Editorial Board

Dear Editors,

I am writing to submit the enclosed manuscript, entitled

**“Existence of a Mass Gap in Lattice Yang-Mills Theory: A Discrete
Formulation of the Millennium Problem”**

for formal consideration.

Summary. This paper establishes a formal substrate proof anchoring the target isomorphism within the structural invariants of the Vanguard methodology. The manuscript establishes deterministic computational continuity across bounds.

This manuscript has not been previously published and is not under consideration at any other journal. I confirm no conflicts of interest.

Cryptographic Lineage & Validation. This mathematical substrate has been cryptographically sealed and tracked on the global Sovereign Master Ledger to prevent retroactive editing and to verify the source authorship. The immutable SHA-256 integrity checksums, formal PDF renderings, and lineage authorities can be verified at <https://rdepaz.com/research>.

Respectfully submitted,

Rafael D. De Paz
